ABSTRACT

As part of a longitudinal study designed to monitor students who entered Kapiolani Community College (KCC) in Fall 1979 for five consecutive semesters, the two sets of data tables in this report summarize the academic progress of the students as of Spring 1981. The first set of tables, which break down data by sex, program, financial aid and academic (passing or probationary) status, and math and English placement test scores, delineates: (1) the rate at which students re-registered for the Spring and Fall 1980 and Spring 1981 semesters; (2) the percentages of students who were enrolled on a full-time basis during these semesters; (3) the average number of credits attempted and earned by students during Fall 1979 and Spring and Fall 1980; (4) the number of students changing their majors during these semesters and the net effect of these changes on enrollment in seven program areas; and (5) the number of students who graduated in Fall 1979 and Spring and Summer 1980. The second set of tables, which break down data by program area and sex, compares semester-by-semester registration rates, full-/part-time ratios, credit-completion rates, changes in program major, and graduation rates for students who entered in Fall 1979 with similar data collected during progressive semesters for students who entered KCC in Fall 1975. A. Introduction

The purpose of the "progression" series of reports in Kapiolani's Student Flow Program is to indicate how many students of a particular entering group are enrolled during each of five successive semesters. Part of the interest in studying an entering group of students is in comparing the results of their progress against those of other groups, which preceded them and/or against national data.

This is the second "report" in the progression series for the Fall 1979 entering students. KSFP Report No. 5 included data at the beginning of the second semester; this update adds complete data through the third semester (Fall 1980) and partial data on the fourth semester (Spring 1981). Special features of this report are:

- tables with cumulative data for Fall 1979 entering students: (1) beginning-of-semester data on registration rates and full-time rates and (2) end-of-semester data on average credits attempted and earned, credit-completion ratios, number and nature of changes of major, and graduates.

- tables with comparative data for the Fall 1975 and Fall 1979 entering groups, by sex and program.

B. Highlights

1. Fall 1979 Entering Students (Appendix A)

- Registration Rates (Table A-1): The data show that 45 percent of the Fall 1979 entering group were enrolled one year after entry and that 36 percent were registered in Spring 1981. Also, registration rates were higher for: majors in food services and health services in contrast to those in other majors; passing students, about twice as high as for probationary students; new students with placement test scores, approximately one and a-half times that of students without such scores.

- Full-time Rates (Table A-2): The data show that 62 percent of the Fall 1979 entering group registered one year after entry were enrolled full-time and that the proportion for Spring 1981 was 58 percent. Averages for health services majors were considerably higher (75% and 96%, respectively) while, as expected, averages for unclassified students were much lower (34% and 33%, respectively). Similarly, higher proportions of new students with placement test scores, than students without these scores, registered for full loads.

- Credits (Table A-3): The data show that, on the average, Fall 1979 entering students attempted and earned more credits in Spring 1980 (11.5 and 8.1, respectively) and in Fall 1980 (11.3 and 8.6, respectively) than in their entry semester; CCRs were also higher (0.70 and 0.77, respectively).

- Changes of Major (Table A-4): The following numbers of students changed their majors during the first three semesters: 128, 113 and 84. The numbers represent 6, 8 and 9 percents, respectively, of students enrolled during those periods. The net effect of these changes in major is given by program in Table A-4a. In general, vocational education programs show net gains while the liberal arts program shows a net loss (except in Fall 1980 when there was no change).

- Graduates (Table A-5): The data show that of 52 graduates to date, 37 were health services majors (28, practical nursing) and 12 were business majors.

2. Comparison of Fall 1975 and Fall 1979 Entering Groups (Appendix B)

- Registration Rates (Table B-1): In both Fall 1975 and Fall 1979, the number of entering students was similar as was the proportion of new students. Registration rates were generally lower for Fall 1979, compared to Fall 1975, entering students. This is especially true for liberal arts majors; registration rates for majors in health services and food services, on the other hand, were higher.

- Full-time Rates (Table B-2): In general, full-time rates for Fall 1979 entering students were lower than for Fall 1975 entering students, by sex, by major program, and by entry status. However, full-time rates for health services majors were higher among Fall 1979, compared to Fall 1975, entering groups.

- Credit-Completion Ratios (Table B-3): CCRs have increased over the three semesters, more noticeably for Fall 1979 entering students than for their Fall 1975 counterparts. However, these ratios generally remain somewhat lower for the Fall 1975 group.

- Net Changes in Major (Table B-4): The patterns of gains and losses are similar for both entering groups. At the end of the third semester, vocational education programs showed net gains for both Fall 1975 and Fall 1979: 65 and 53, respectively. For the Fall 1979 group only, there was a net loss of 42 students in liberal arts.

- Graduates (Table B-5): After three semesters, the numbers of graduates from the Fall 1979 entering group (52) are lower than for the Fall 1975 group (100). Especially noteworthy are the decreases in graduates after one academic year (2nd semester + summer) and after three semesters. These differences are due somewhat to the drop in graduates among health services majors.

APPENDIX A

Tables on Fall 1979 Entering Students

TABLE A-1
